Evaluate the Performance of an E-learning Application Using Jmeter

Description:

As a Test Engineer, you are asked to develop an evaluation test for users logged into an e-learning application.

Background of the problem statement:

As a part of the performance testing in any web portal, the back-end admin requires a module that can retrieve the performance of all the functions. This should be as per your requirement.

You must use the following:

JMeter 5.1.1 version

Java Development Kit (Version 8)

The following requirements should be met:

Some of the source code should be tracked on GitHub repositories. You need to document the tracked files that are ignored during the final push to the GitHub repository.

The submission of your GitHub repository link is mandatory. In order to track your task, you need to share the link to the repository in the document.

The step-by-step process involved in completing this task should be documented.
